

Hygienic quality assurance by

the economic way to secure reprocessing

What offers the HygCheck® - System:

YOUR INDEPENDENT PARTNER

SynCen - Synergy Centrum for economic quality co-ordination GmbH and accredited testing laboratories with decades of knowledge and international expertise

YOUR BENEFITS
Development and expansion of your own quality management in practice and recognized certification

- Service for quality assurance of the products of the principal.
- Tailored to the specific reprocessing process.
- Quantitative, objective analysis to document the cleaning, disinfection and sterilisation process.
- Internal activity recording in the reprocessing of medical devices by the employees on site.
- Optimal economic, meaningful, quantitative data analysis.
- Significant contribution to quality management.
- Confirms assured quality during operation.
- Lowest necessary cost.
- Registered trade mark of SynCen GmbH.

- Results of quantitative analysis based on the organic load allow the evaluation of cleaning performance (depletions) and the disinfection or sterilisation (reduction factors).
- Test set according to the latest state of knowledge and technology with qualified indicator systems.
- Indicators are manufactured under standardized conditions and monitored for their performance abilities.
- Evaluation of results by the testing laboratory accredited for this purpose, ie, no readings or subjective judgements, but only objective quantitative results of the analysis.
- The technical and forensic responsibility is supported by the accredited testing laboratory.

- There is an overall concept that is designed for optimal long-term quality.
- To delivering high quality and cost effectiveness.
- Instruction of the user / service personnel.
- Increases the quality, transparency and efficiency.
- Quality and documentation on high level!
